

IRONWOOD. Sound business furniture
from Missoula, Montana.

GENERAL Catalog of office and computer furniture.

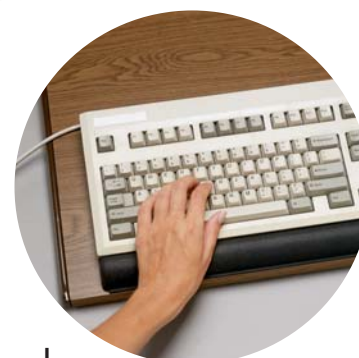

IRONWOOD is a furniture manufacturer headquartered in the Rocky Mountains.

This does not mean we make log desks with antler drawer pulls any more than it means we ride horses to work each morning. Our western home does, however, impact our company in other ways.

The Rocky Mountain landscape is solid, durable and lasting. Our furniture is, too. We use quality materials and time-tested construction techniques. We incorporate design that's sensible, the kind that won't have you scratching your head a year from now wondering, "What was I thinking?"

Our service is western, too. Out here people have a code about helping each other. Namely, we do it. Translation? We offer fast turnaround time on orders. We're eager to help if customers have questions during assembly or any other time. We have a warranty that backs our products like a rancher backs his word.

IRONWOOD has been building solid, sensible furniture in the Rocky Mountain West since the '80s. Our heritage and location have helped to make us a sound, competitive company. And frankly, we believe it's made our furniture better. Not fancier. Not trendier. Just better. Now, let's get on with the furniture.

The Ironwood Guarantee

Manufactured to the most exacting standards and inspected several times throughout the manufacturing process, Ironwood furniture is guaranteed to be free from defects in materials and workmanship for up to one year after purchase. This guarantee is limited to repair and replacement only and does not cover damage outside our control.

Shipping Policy

All products are shipped common carrier unless otherwise indicated. Ironwood will ship your order within 15 business days from receipt of order. All products are ready to assemble. Please call Customer Service 1-800-769-5693 for detailed information.

Ironwood furniture is built to last in every detail. Work surfaces and shelving are made from warp-resistant, 45# industrial grade particleboard. Laminates are thermally fused into wood surfaces providing scratch resistance and water holdout. Fittings assemble easily and hold firmly. And all furniture is shipped ready to

assemble. In short, we use fine materials, painstaking processes, and more

handwork than most

companies to ensure we live up to our word and your expectations.
