

IRONWOOD MANUFACTURING

LIBRARIES

GLACIER

I R O N W O O D

Libraries are the one place where your reasons for visiting are always changing. It is not a single purpose environment – you may be researching, learning or collaborating on projects with others. Your needs may be online or written long ago. We bring this understanding with Ironwood's full line of library furnishings.

Glacier Series

With low pressure laminates and matched PVC edging, this line combines easy maintenance with durability, while staying within your budget.

3000 Series

The engineering in this series lends itself to a greater degree of flexibility in design and colors. Low pressure laminates with the addition of wood edging and accents brings a traditional feel to any room.

Vision Series

Building on the engineering of the 3000 series, the Vision Series brings wood veneers and hardwood molding to create warmth and elegance.

Circulation Desks

When you need to know if a book is available, check out a book or return one you just finished, this is the place. Knowing how to search and where to look starts at the focal point of your library – the circulation desk.

Shelving

Whether storing books, periodicals, news print, video, or audio, it needs to be organized. Our single-faced and double-faced ranges provide the storage and our options help with the organization.

Technical Resources

Some resources require a method of display and storage that is as unique as the information they provide. We have a wide range of resource storage options for newsprint, magazines, dictionaries, and maps.

Tables

Sometimes you need a place to spread out while doing your research or making notes. Other times you need a place for a small group discussion or group projects. Ironwood has the solution for your table needs.

48R-OF-B4-DO

Carrels

Our carrels provide that little bit of privacy to help people stay focused. Use our carrels for basic studying and test-taking; they are also ideal for filling out applications and using as voting booths.

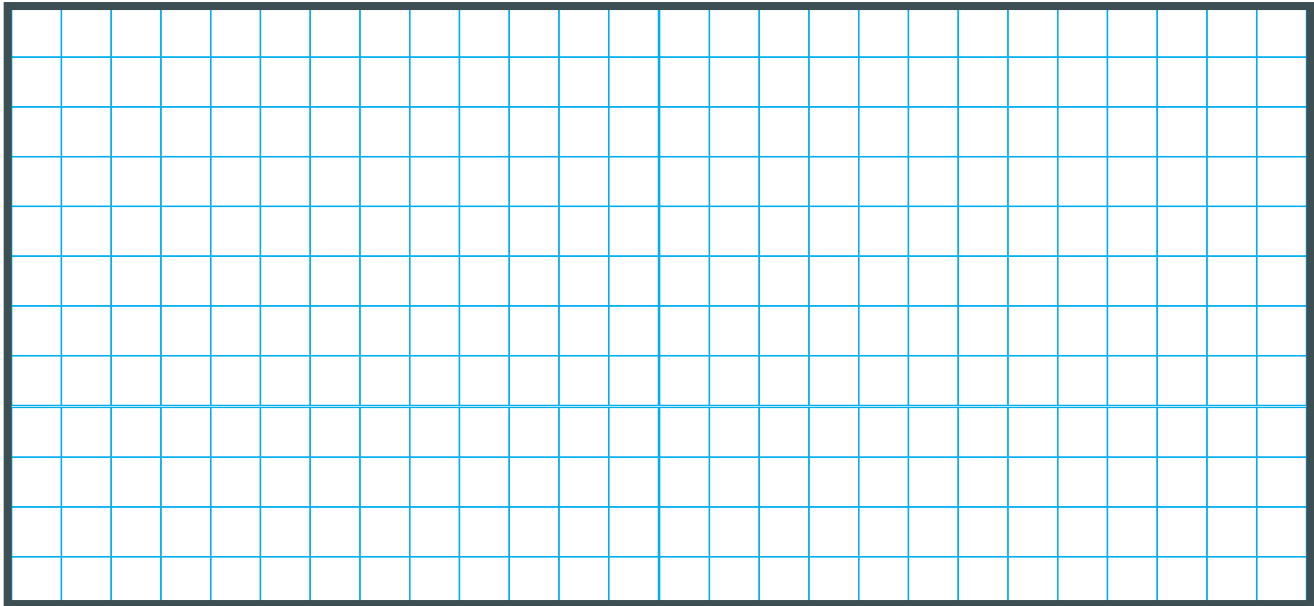

Multimedia

Though nothing quite replaces the feel of turning a page, our world of learning and research has expanded to the online world. Our multimedia library furniture provides the work space needed to take you online. These desks provide areas for teaching or a comfortable area to explore and do your own learning.

(See the Grand Canyon brochure for more computer tables options.)

Options to consider:

- Display shelves for magazines
- Extra shelves
- The Glacier line has the Terrain series with steel shelves; the 3000 Series and Vision Series can be modified to use these same shelves.
- Wire shelf dividers
- Shelf dividers for steel shelves.
- The 3000 Series can be quoted with custom high pressure laminates.
- Custom configuring available
- We will provide 2D and 3D room proposals.
